

# DEEPAK NISHAD

## MERN STACK DEVELOPER

Ludhiana, Punjab, India

+91 86993 58629 | dcreation2706@gmail.com

My-portfolio | Github | LinkedIn

### Professional Summary

MERN Stack Developer with practical experience building scalable, responsive and production-ready web applications using React.js, Node.js, Express.js and MongoDB. Passionate about creating clean user interfaces, secure backend services and reusable software architecture that delivers excellent user experience. Hands-on experience developing RESTful APIs, implementing JWT based authentication, integrating third-party APIs, designing responsive layouts and deploying full-stack applications using modern cloud platforms. Strong understanding of component-based development, modern JavaScript, Git workflows and writing maintainable code following industry best practices.

### Featured Projects

- MERN Portfolio Website** - Designed and developed a fully responsive personal portfolio website showcasing projects, technical skills and contact information using the MERN Stack with modern UI animations. Built modern responsive UI, integrated backend contact form with MongoDB Atlas, implemented reusable React components, optimized loading performance, deployed frontend and backend on cloud platforms. *Tech: React.js, Node.js, Express.js, MongoDB Atlas, Framer Motion, REST APIs*
- Hospital Appointment Management System** - Built a full-stack hospital appointment management platform featuring secure authentication, appointment scheduling and role-based dashboards for administrators, doctors and patients. Implemented role-based JWT authentication, created separate dashboards, developed appointment booking workflow, protected routes using middleware. *Tech: React.js, Node.js, Express.js, MongoDB, JWT*

### Technical Achievements

- Built 4+ production-ready Full Stack and React applications using the MERN Stack
- Developed 30+ reusable React components following component-based architecture
- Designed and implemented 25+ RESTful API endpoints with Express.js
- Implemented secure JWT Authentication and protected routes across multiple applications
- Reduced duplicate frontend code by approximately 40% through reusable UI components
- Successfully deployed applications using Vercel and Render with MongoDB Atlas integration
- Maintained fully responsive layouts compatible with desktop, tablet and mobile devices
- Managed source code using Git and GitHub with structured version control practices

### Certifications

- MERN Stack Development

### Technical Skills

**Frontend:** HTML5, CSS3, JavaScript ES6+, React.js (JSX, Functional Components, React Router, DOM, Axios), Props, State Management, Hooks (useState, useEffect, useContext, useRef, useMemo, useCallback), Framer Motion, Responsive Design, Flexbox, CSS Grid, Media Queries

**Backend:** Node.js, Express.js, REST APIs, JWT Authentication, bcrypt, Fetch API, Middleware, MVC Architecture, CORS, Error Handling, Environment Variables

**Database:** MongoDB, MongoDB Atlas, MongoDB Compass, Mongoose, Schema Design, Validation, CRUD Operations, Indexes, Aggregation Basics

**Developer Tools:** Git, GitHub, VS Code, Vercel, Render, Postman Basics, npm

### Education

**Bachelor of Computer Applications (BCA)**

Guru Nanak Dev University (GNDU), 2023-2026

**Internship:** MERN Stack Developer Intern - Worked on real-world MERN Stack applications involving React, Node.js, Express.js and MongoDB. Developed responsive user interfaces, integrated REST APIs, implemented authentication, optimized reusable components and collaborated using Git-based workflows.

### Relevant Coursework

- Database Management Systems
- Web Technologies and JavaScript
- Operating Systems and Computer Networks

### Languages

- Hindi (Native Proficiency)
- English (Intermediate / Working Knowledge)
- Punjabi (Native Proficiency)
